COMPUTER SCIENCE RESEARCH SEMINAR

Overcoming Virtualization Overheads for Large-vCPU Virtual Machines

Ozgur Kilic, PhD Student
Department of Computer Science, Binghamton University

Friday, February 22, 2019 at noon in room R15, Engineering Building

Abstract: Virtual Machines (VM) frequently run parallel applications in cloud environments, and high-performance computing platforms. It is well known that configuring a VM with too many virtual processors (vCPUs) worsens application performance due to scheduling cross-
