

PHYSICAL FACILITIES

ASBESTOS FIELD GUIDE

Physical Facilities

This asbestos field reference guide is intended to function as a resource for Physical Facilities employees. It identifies locations and types of building materials containing asbestos in the areas where abatement has occurred. The reference materials used to compile this guide include:

-

prior to construction projects
Physical Facilities Asbestos Coordinator

major buildings with the 12 most likely occurrences of
each major building have been marked to show asbestos

reference every building on campus or every component that has
reference guide does, however, document the most likely
resumes occur. Please remember that the majority of our
2, when asbestos was a common building material. As a
ation otherwise, assume asbestos may be present. After
guide, you find questions regarding asbestos within an area,

Robert Mulcahy
Asbestos Coordinator
(607) 7774018

ment" that will reflect new information on future
of this guide, you will receive revisions and will be
re placed with the guide.

Definitions and general asbestos information(continued):

NOTE: Asbestos was no longer legally used in buildings constructed after 1972.

Information for Asbestos Locations spreadsheets and small scale drawings included:

*Shaded areas on small scale drawings represent spaces that have undergone asbestos abatement

Asbestos Locations Spreadsheet legend:

Yes= contains asbestos

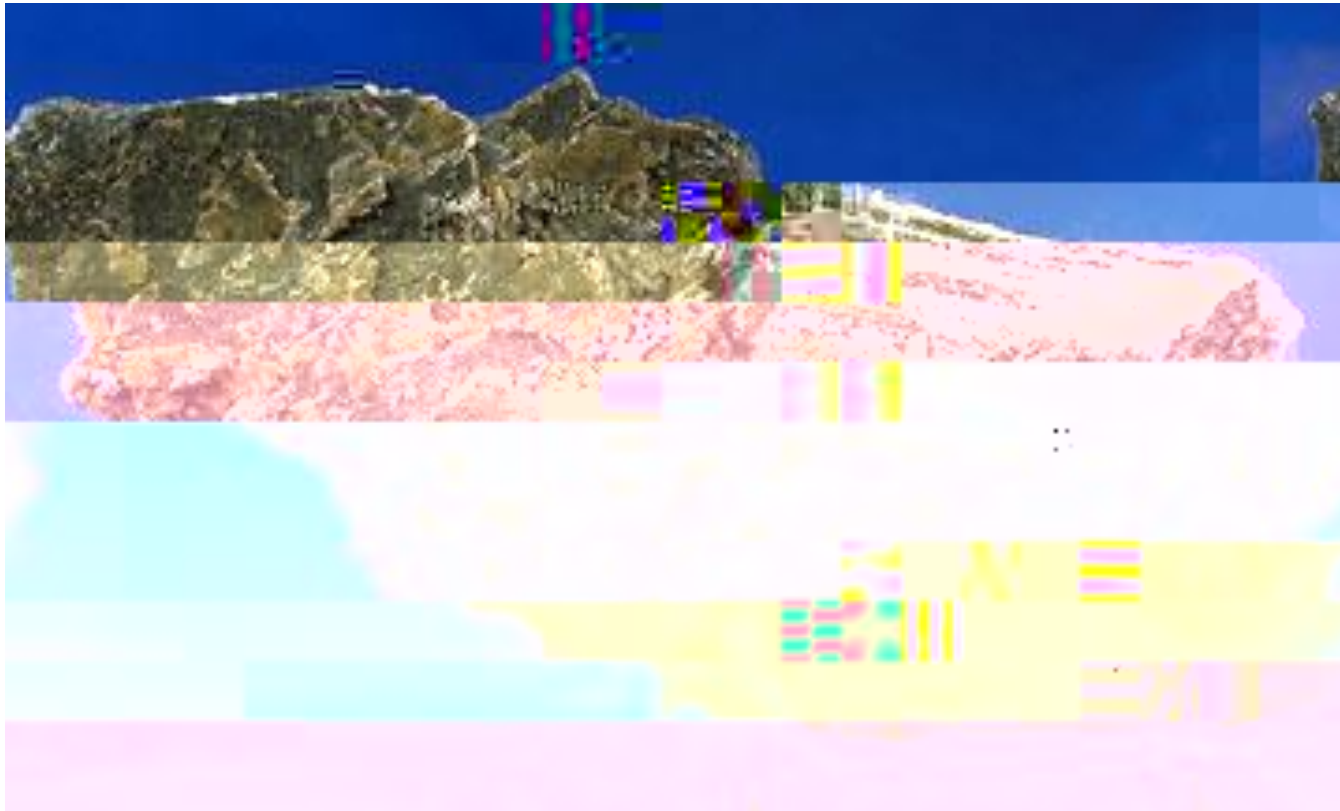

No = does not contain asbestos

N/A = Not applicable
